YOUR TRANSPORTATION PARTNER FOR THE CANADIAN GAS & CHEMICAL INDUSTRY

SERVING CANADIAN GAS & CHEMICAL COMPANIES

Canada's leading gas and chemical manufacturers rely on Canada Cartage for the safe and on-time delivery of their products. Canada Cartage offers a full-service solution designed to meet the unique demands of the industry through industry-leading training, safety and compliance, expertise in chemicals and hazardous materials, expert drivers, and specialized equipment to deliver peace-of-mind.

To ensure continuous improvement, we track and deliver Key Performance Indicators (KPIs) to our customers on a regular basis to monitor and optimize kilometers driven, cost per delivery and load, capacity factor and on-time delivery percentages. We hold regular account meetings to review safety and historical data to plan for future initiatives.

Canada Cartage represents some of Canada's biggest and most respected companies in the gas and chemical industry, offering a superior service to our customers with the following benefits:

CUSTOM FLEETS OUTFITTED WITH SPECIALTY EQUIPMENT

Our nationwide fleet includes an extensive inventory of gas and chemical equipment that is available in many specialized configurations. With Canada Cartage's investment in resources, we are able to replenish our fleet to meet current industry standards and our customers' gas and chemical transportation needs.

OUTSOURCED RISKS

Instead of investing in the high cost and risk of private fleet ownership, outsourcing allows you to focus on your core business. We take care of safety and compliance and bear responsibility for accident investigations, and insurance claims. As your outsourced partner, we also take responsibility for fleet upgrades, equipment maintenance, and driver hiring, training and management.

GAS & CHEMICAL

OPERATING EFFICIENCY

Our outsourced solution includes access to a fleet operations manager, a dedicated account manager, and a front-line dispatcher that handles daily calls for support, driver scheduling, and on-demand orders for equipment requirements. We make deliveries around the clock, year-round, and can shift our fleet to meet your production demands.

In Western Canada, Canada Cartage provides on-demand drivers for Oil Well Services. These drivers are specifically trained to handle liquid nitrogen and liquid CO₂ and are able to navigate specialty trucks and equipment to off-road locations. Canada Cartage also offers resources during plant outages by immediately mobilizing an agile and responsive solution that includes access to additional drivers, and equipment to properly manage the situation.

FREIGHT VISIBILITY AND KPIs

Canada Cartage's technology and customer portal gives 24-hour visibility on delivery status, and compiles statistical data that builds a complete picture of our customers' final mile delivery program.

BEST-IN-CLASS TRAINING & COMPLIANCE

We only hire experienced tanker drivers with clean driving abstracts and provide them with a comprehensive 3-week in-class and on-the-road training program that has been approved and certified by some of the world's leading gas and chemical companies.

Our fleet and drivers follow stringent operational requirements and pass frequent audits to authorize all compliance procedures. Recently named as "Canada's Fleet Manager of the Year", we operate a preventative maintenance program that consistently exceeds federal and provincial standards.

OUR GAS AND CHEMICAL EQUIPMENT:

- Tandem or Tri-drive tractors – daycab or bunks
- Straight trucks
- Tankers
- Flat beds
- Curtain-side
- Vented units

WHO WE SERVICE

- Gas and chemical manufacturers/distributors

CANADA CARTAGE: #1 IN CANADIAN FLEET OUTSOURCING

Our Canadian success story began in 1914, as one of the first for-hire carriers in the country, starting with one horse and one cart.

Today, we are the nation's largest provider of outsourced fleets, with a network of facilities across the country, over 3,000 transportation professionals on staff, and an award-winning reputation for outstanding customer service.

We operate across Canada with company-owned terminals and distribution centres in British Columbia, Alberta, Manitoba, Saskatchewan, Ontario and Quebec.
