

**TRUSTED,
TRIED, AND
TRUE.**

YOUR TRANSPORTATION PARTNER FOR THE CANADIAN BUILDING & CONSTRUCTION INDUSTRY

Canada Cartage provides the building and construction industry with a turn-key solution that includes driver recruiting, training, safety and compliance, risk and liability coverage, equipment procurement, supply chain engineering, and on-going maintenance – a complete solution tailored to the demands of your business.

To ensure continuous improvement, we track and deliver Key Performance Indicators (KPIs) to our customers on a regular basis to monitor and optimize kilometers driven, cost per delivery and load, capacity factor and on-time delivery percentages. We hold regular account meetings to review historical data and plan for future initiatives.

We represent some of Canada's biggest and most respected brands in the building and construction industry. You can even choose to have our trucks and drivers outfitted in your logo and colours, following your corporate standards.

SERVING CANADIAN BUILDING & CONSTRUCTION COMPANIES

We offer superior service to the building and construction industry through the following benefits:

OUTSOURCED RISKS

Instead of investing in the high cost and risk of private fleet ownership, outsourcing allows you to focus on your core business. We take care of safety and compliance, and bear responsibility for accident investigations, hazardous spills, cargo claims, and insurance claims. As your outsourced partner, we also take responsibility for fleet upgrades, equipment maintenance, and driver hiring, training and managing.

CUSTOM FLEETS OUTFITTED WITH SPECIALTY EQUIPMENT

We have extensive experience transporting building and construction materials. Our specialized fleet with high load and weight capacity includes trucks designed to deliver to complex job sites. Our heavy spec trucks are outfitted with additional equipment for increased unloading flexibility and carrying capacity. Our drivers are specially trained in forklift and crane operation, flat deck loading and unloading, and proper load securement.

OPERATING EFFICIENCY

Our outsourced solution includes access to a fleet operations manager, a dedicated account manager, and a front-line dispatcher that handles daily calls for support, driver scheduling, and on-demand orders for equipment requirements. With our unique hub and spoke model, and route optimization technology, we can deploy additional equipment and drivers on short notice for optimal efficiency.

A BEST-IN-CLASS SOLUTION FOR SEASONAL PEAKS AND SURGE CONTROL

Our outsourced model is scalable and ideal for an industry that is impacted by our country's seasonal challenges. We offer unparalleled flexibility with access to the right-size fleet and drivers, any time. Our model is specifically designed to scale up or down to help you meet short-term and seasonal volume demands. This can significantly reduce your current operating costs throughout the year while maintaining high levels of customer satisfaction.

OUR BUILDING AND CONSTRUCTION EQUIPMENT

- Straight trucks
- Curtain-side and roll-tights
- Step decks
- Mounted forklifts and boom cranes
