SERVING CANADIAN RETAILERS

Our industry leading outsourced transportation solution provides Canadian retailers with the following benefits:

INNOVATION THROUGH BEST-IN-CLASS DELIVERY TECHNOLOGY

We know that in the retail industry, delivery delays can produce complicated, costly outcomes. Our route optimization technology and supply chain engineering team ensures that retail locations receive their products when they need it, where they need it and at the lowest possible delivery cost. We hold regular account meetings to review historical data and plan for future initiatives to ensure continuous improvement.

ON-TIME DELIVERY WITH LESS HASSLE AND LESS RISK

Our dispatchers, drivers, and maintenance teams are on duty 24 hours a day, 7 days a week, every day of the year. With an on-time delivery rate of 98%, you can have confidence that your goods will be on the shelves whenever your customers want them. We track and deliver Key Performance Indicators (KPIs) on a regular basis to monitor and optimize kilometers driven, cost per delivery, and on-time delivery percentages.

A MODEL DESIGNED FOR SEASONAL PEAKS

To meet peak-time seasonal demands such as Christmas and seasonal surges, or for short-term special promotions, retail customers leverage our unique hub and spoke terminal model to deploy additional equipment and drivers on short notice. For many retailers, this significantly reduces operating costs while keeping customer satisfaction high.

SAFETY AND COMPLIANCE

We are industry leaders, and ensure the highest levels of driver and public safety are achieved through driver training programs, regularly scheduled maintenance, and rigorous inspection routines. We are expert at delivering into retail outlets, malls, and curbside storefronts, with care and consideration. The public's safety is always our priority.
